

E D I T O R I A L

Thanks China

In early 2020, the corona disease arrived to Europe. The European countries were not prepared to fight against this evil and were faced with major health problems. In these critical times, the government of China and the people of China supplied Serbia with the much needed medical necessities and sent to Serbia a team of medical experts.

As a humble token of gratitude and appreciation of this great help that the people of China rendered to the people of Serbia, "MATCH COMMUNICATIONS IN MATHEMATICAL AND IN COMPUTER CHEMISTRY" is publishing the present special issue, entitled "CHEMICAL GRAPH THEORY IN CHINA".

According to a Serbian proverb, "*Prijatelj se u nevolji poznaje, kao zlato u vatri*" = "*A friend is recognized in trouble, like gold in fire*".

THANKS FRIENDS !
