

E D I T O R I A L

This issue of “*MATCH — Communications in Mathematical and Computer Chemistry*” is the first published by the Faculty of Science Kragujevac and the University of Kragujevac.

By moving *MATCH* from Bayreuth to Kragujevac we have tried to change its format as little as possible. Also the scientific profile of our journal is to remain the same as before. We trust that this is evident from the present issue.

As before, it is required that papers published in *MATCH* contain non-trivial, especially discrete, mathematics or communicate non-routine computer-based procedures and have a clear connection to chemistry. As before, we will apply these criteria in a tolerant and non-exclusive manner. Review articles will be especially welcome.

In the future we will also try to acquire articles dealing with the history of mathematical chemistry (and related fields of science).

The new web site of *MATCH* is

<http://www.pmf.kg.ac.yu/match>

where those intending to submit papers, to subscribe to *MATCH* or to see the contents of the former issues may find all the necessary information. Please visit it!

Additional inquiries concerning *MATCH*, as well as papers submitted for publication are now to be sent to:

Professor Ivan Gutman
Faculty of Science
P.O.Box 60
34000 Kragujevac
Serbia and Montenegro

e-mail: match@knez.uis.kg.ac.yu

We are proud to announce that for year 2001 the impact factor of *MATCH* is 0.579, which positions it among the distinguished (but not top) chemical and mathematical journals.

An important request: In order to keep our impact factor high, please always and everywhere quote *MATCH* as:

MATCH – *Commun. Math. Comput. Chem.*

If you quote *MATCH* otherwise, this quotation may remain unrecorded, resulting in an unrealistically low value for the impact factor.

The Editors thank the authors who sent their papers to *MATCH*, invite other colleagues to do this in the future, and welcome any criticism and suggestion for improvement of our journal.

**Alexandru T. Balaban, André Dreiding, Patrick W. Fowler,
Ivan Gutman, Adalbert Kerber, Douglas J. Klein, and
Nikolay S. Zefirov**

* * * *

The University of Kragujevac and the Faculty of Science Kragujevac are exceptionally honored to become the publisher of such an esteemed journal as *MATCH* – *Communications in Mathematical and Computer Chemistry*. This journal has for years contributed to the development of strategically important fundamental sciences and research. We are particularly proud that its editor is a professor from the University of Kragujevac.
