

Professor Fuji Zhang is 80

Fuji Zhang is a pioneer of chemical graph theory in China, teacher of many, and the first Chinese author contributing to "MATCH Communications in Mathematical and in Computer Chemistry" (in 1985). He and his students solved many mathematical problems to motivate the progress of mathematical chemistry. Admiring his accomplishments, it is our honor and privilege to congratulate and pay tribute to our esteemed colleague on the happy occasion of his 80th birthday.
